

CAPABILITY STATEMENT

RENOVATE by Berkowitz, LLC

COMPANY OVERVIEW

Renovate by Berkowitz™ (RbB) was established following a lengthy period of research and development by the former owners of J.E. Berkowitz, LP (JEB). As an architectural glass fabricator since 1920, JEB saw a need in the market for a product or system for existing office building owners to both economically and with minimal disruption, upgrade their single glazed windows/curtain wall systems. Typically, buildings built prior to the mid-1970's used single-glazed windows or curtain wall systems.

In 2009 we formally moved ahead into our new business, forming our new company, Renovate by Berkowitz™, LLC. Our years of experience in the glass fabrication industry and our continued R&D work on Renovate by Berkowitz™ system had paid off, landing our initial installation of Renovate in 2010.

COMPANY DESIGNATIONS:

DUNS: 967272654

CAGE: 6WDQ5

NAICS

327211 - Flat Glass Manufacturing

327215 - Glass Product Manufacturing Made of Purchased Glass

332323 - Ornamental and Architectural Metal MFG

337215 - Showcase, Partition, Shelving MFG

339999 - All Other Miscellaneous

Manufacturing

423390 - Other Construction Material

Merchants

PSC

9340 – Glass Fabrication Materials

5680 – Misc. Construction Material

Set-Aside:

Small Business

KEY SYSTEM BENEFITS:

- Significant improvement in thermal performance (from R-1.0 to R-5.5 - 7.0+), which has been laboratory tested.
- Improved acoustics/noise reduction. The sound transmission coefficient (STC) improves from 30 to 37 - 44+.
- Little to no disruption of tenants during installation.
- Increased security against break-ins and blast.
- Contributes to LEED (Leadership in Energy and Environmental Design) requirements to a minimum of six LEED points.
- Reduces HVAC usage and maintenance.
- Mechanical equipment can be downsized when the need for new mechanical equipment arises.
- The RbB system is patented in Canada and in the United States
